

Get your
runny,
stuffy nose
to **COOL IT!**

Chronic Rhinitis

SYMPTOMS & CAUSES

Runny nose

Nasal
congestion

Post nasal drip
(*mucus in the throat*)

What Causes Chronic Rhinitis?

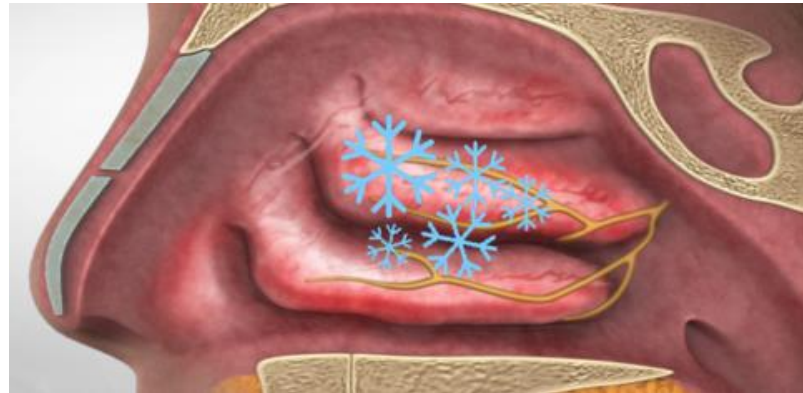

Out of balance nerves may be sending too many signals to your nose, telling it to drip, run and swell more than necessary.

ClariFix[®] Cryotherapy

HOW IT WORKS

- Reduces runny, stuffy nose by interrupting the signals sent from the out of balance nerves
 - Goes to the root of the problem: the inflamed nasal lining and underlying nerves
 - Delivers cold temperatures to the out of balance nerves in the back of the nose

Stops the source of the symptoms for lasting relief

Get Your Life Back

with a cool treatment using ClariFix[®] cryotherapy

Enjoy Life Without Tissues

Patients report a reduction in runny & stuffy nose symptoms

Available In-Office

Treatment can typically be done in the office with local anesthesia

Minimal Downtime

Most patients typically return to normal activity the same day

The COOL Effects of ClariFix Cryotherapy

Decrease in Runny Nose and Congestion

A clinical study shows that patients reported a significant decrease in runny nose and congestion compared to initial symptoms

Lasting Improvement

4 out of 5 patients reported long-lasting symptom improvement
